you know sometimes it's hard to distinguish between illusion and reality when were younger we take it for granted that we see what we see and objects in the world in front of us are precisely as we see them and then of course it's time to atone we have more and more doubt about that as you would call going back to when you were younger I'm sure everyone in this room had the feeling when they were a child it was impossible for you to conceive of dying so you assumed more or less if you continue to live forever even though nobody did before was an illusion a child a solution to one which most people have of course that goes with time but other illusions continue to remain and sometimes a government takes advantage of one illusion that stays stays with us to a great extent unless we have the good fortune or the misfortune the case may be to have detachment another illusion is the idea that we're living in the best of all possible worlds this is a this is a favorite a favorite strategy of the of the fascist the type of government totalitarian types of governments to not just crisis in order to keep the people from being arrested and actually you're seeing it applied I think rather systematically in a number of areas in the government of the United States today again and again I think you are being assured that you are living in the best of all possible worlds again and again you see different tactics being used to make the government's power loveable actually there's nothing new about this this earlier the moment our probably even before that the

[00:02:01 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=121s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=121s)

our probably even before that the patricians and their counterparts have found ways to make their power lovable so they wouldn't have so much trouble from the previous that's a problem in the its innocence here again today but there's a duplicity in that is a duplicity in making power lovable with false slogans and then making things appear to be better than they are which I don't happen to like for example I am very conscious of seeing fascist tendencies in our government today I suppose that right now that places me in the FBI file under I'm probably found with a lot of other people being investigated under the title of anti fascist activities which is a derogatory clowns this move is point of view but this is this is very relevant to the entire subject of the assassination let me go back let me go back to the way things were about this time just before the assassination we had a young president who was showing signs increasingly of being a forceful president and a liberal president in the sense that he was going to make changes that had not been made before and a very strong reaction was occurring in a number of places particularly in areas such as Dallas Texas and this is not an indictment of people of Dallas but there are individuals in Dallas that have an unusually strong control over key individuals on the police force was caused at Dallas to be somewhat different than other cities President Kennedy was also moving in the direction

[00:04:02 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=242s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=242s)

Kennedy was also moving in the direction of doing away the 27 1/2 percent deduction on the income tax for men in the oil business which of course was primary was a primary concern to some individuals in dollars President Kennedy had reached a Broncos mom of sorts with premier khrushchev of Russia and was in the process of reaching an understanding with Fidel Castro I'm sure that it is possible to have a great many views on the value of these conclusions these decisions that he had made but the fact is that he was the president and he had made them and his basic objective was to try and minimized involvement in the war which would lead increasingly to escalation and more escalation until we finally had involved in hydrogen war which is more or less a situation in which we find ourselves today now the reaction of a number of individuals especially in certain areas of Texas was that President Kennedy in ending the Cuban adventures in trying to reach an understanding with a Christian in making statements such as he made in his speech before the American University on June 10th that we breathe the same air as the Russians which is perfectly true and should have been made and it's something we don't think about very often but the fact that he made these statements caused him to be regarded by a number of extreme individuals as a communist or person selling out to the commons so that there was it there was a certain side of the spectrum of essentially the

[00:06:01 \(https://www.youtube.com/watch?v=P5zeuEm4Yzq&t=361s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzq&t=361s)

side of the spectrum of essentially the extreme right-wing area especially in southern states that had a venomous at george john kennedy now this is just a brief perhaps oversimplified summary of the situation as it existed when John Kennedy visited Dallas now with that background let's now jump from reality into the world of illusion for a moment and we'll describe the official Lyndon Johnson administration version of what happened it has no connection at all with reality it has exactly as much substance as the story of Snow White and the Seven gloss but it has the gold presidential seal on the outside and that's good enough for NVC anyway the official story is that every possible safeguard had been taken detective president and he was proceeding down Elm Street having made the turn from Houston when from his lair in the sixth floor the School Book Depository a Marxist communist was crouched I think actually oh there's some difference between a Marxist and a communist but it's desperate matter in fairy tales he's making the same thing so he's a monstrous communist and his crops there with his mannlicher-carcano he finds three rapid shots shots a fantastic marksmanship and as a result the president of course was killed and the governor of Texas is wounded and as I

[00:08:03 \(https://www.youtube.com/watch?v=P5zeuEm4Yzq&t=483s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzq&t=483s)

governor of Texas is wounded and as I know Mark Lane has explained it suddenly we this is such an unusual rifle and the ammunition so unusual that one bullet created seven different wounds and emerged in pristine shape as a matter of fact there was a delay of approximately a second and a half between the time that the both finished going to President Kennedy and began a journey through the governor no matter the president/ceo is on the outside and it was good enough for Newsweek anyway this is the official version in reality what happened was this and I'm going to have to be general for two reasons one because there are great many things that I don't know about the assassination I have never tried to pretend to know more than I do although I have read magazine articles which have me saying things I haven't said in indicating that I pretend to know more but another reason I can't go into great detail is because some of the details we have would indicate what would cause certain people to move from where they are and create certain problems for the rest of our investigation but I can tell you generally what happened generally what happened was this an elaborate conspiracy had been worked on for a very long term there are three levels course classification that's I know you well know as an arbitrary thing but for for reasons of convenience we classify we called operating level individuals pulling triggers operating the radios driving cars intermediate level individuals providing services

[00:10:01 \(https://www.youtube.com/watch?v=P5zeuEm4Yzq&t=601s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzq&t=601s)

level individuals providing services such as David Ferrie Jack Ruby and others and then the sponsor level which I can't go into too much detail it's kind of high up but those are the three general levels anyway by the time the president made his turn the men who would kill him was set to go there had to be no less than four basic points how much the shooting occurred they had to be noticed before impossible five I might add before I even go into them but anybody who has ever been at Dealey Plaza or has ever seen a picture of Dealey Plaza will know that if there was a lone assassin sitting in the sixth floor the Book Depository he would have had to have his shot at the president as the president approached slowly towards him on Houston Street this was the best shot he would ever have the fact that this was passed up indicates along with many other things that the lone assassin was not there the reason they waited until the president had almost reached the sign was so that he was in a central point so that he could be hit from many directions the objective was not to wound him not to hit him several times but to make sure that he was dead or dying before he reached the triple underpass so that there would be no danger of his surviving and having control of major investigative agencies such as the FBI because had he survived and had he been in control the FBI every individual involved would have

[00:12:01 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=721s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=721s)

every individual involved would have been caught by now so it had to be assured that there was overkill that's why you can't see the autopsy pictures that's why no one can see them that's why a pathologist selected by this community cannot look at me because the autopsy pictures will say that President Kennedy was hit from a number of different directions the autopsy pictures will show that he was hit in the front of the head at least twice was ill that there's a hole in the president's forehead at the temple line and it will show that the right side of his head has been torn off by bullet coming from the right and God knows how many other ones but at least two from the front and you aren't supposed to see that because you are supposed to be dutiful Americans and believe the fairy tale of the lone assassin because that's what the president wants you to believe but in order for you to believe that you cannot see the autopsy picture so even as I point this out I must caution you and this may be hard for some of you to accept but please believe me I've never been more sincere I am sure that if the government is able to accomplish it it will one day reproduce autopsy pictures which will appear to be autopsy pictures and support the lone assassin theory I think they're having some technical problems I'm just trying to say that there is nothing they will not do there is nothing they will not do they didn't hesitate to kill Jack Kennedy in Dealey Plaza and there is nothing they will not do the operation for all practical

[00:14:05 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=845s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=845s)

do the operation for all practical purposes continues you can see that again and again we can in the constant interference with our investigation in witnesses being harassed moved away one thing after another constant monitoring of telephones what this means is that there is a unique interest on the part of high officials in our federal federal government in the truth being concealed from the American people the significance of that our going to look further I mentioned that there had to be four groups of suitors there had to be a rifle firing from Houston Street either from the record building or the daleks building I think that most of the serious critics are in harmony about that by now because the shot is it governor Connally was such an aerial could not have come from them from the Book Depository it appears likely the Farwest shooting from the Book Depository although it is obvious that Leon's will have nothing to do with it he didn't shoot any weapons that day and there's no indication that he was in any way involved in assassination Ximena faculty the indication is quite the opposite it is very clear that they were shooting from the grassy knoll not only from behind the stone wall but further back behind the picket fence back towards the overpass area as a matter of fact on the day of the assassination such a large percentage of the witnesses saw her the shootings in that area heard I said used because they're only a few that saw heard the shooting from that area that was taken for granted that the president

[00:16:00 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=960s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=960s)

was taken for granted that the president was shot in the grass and all it took about 24 hours before the official scenario had been issued and the emphasis was put on shooting from the Book Depository shooting from the Book Depository but the main bulk of the shots came from the grassy knoll area and 60% of the witnesses in Dealey Plaza heard those sounds and we've talked to at least one person that is that was in the grassy knoll area and saw all the men behind a stone wall and other witnesses have seen the men half twitch running away behind from behind the stone wall throwing something into the back of a car and driving off of the rapid rate of speed because these things were rather irrelevant so they weren't brought into the Warren Commission hearing this is what happens now the last apparent shooting place is something that we have come across recently several months ago and you may have seen it it got some attention from the news services which is was a surprise to us and others mentioned in passing if you're interested in the one I ask that questions are going to it more later there appears that the subsurface drainage system in Dealey Plaza was also used Dealey Plaza used to be a residential area a lot of houses there before they remove the houses and cleared it out to make this incredibly beautiful Plaza with us instant Mussolini arcades and all these beautiful pergolas and things that you've seen pictures prior to that there were many houses so there had to be a drainage system the drainage system is a rather complete and it's an interconnecting maze of tunnels the

[00:18:01 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1081s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1081s)

interconnecting maze of tunnels the there was fifteen inches wide the largest 30 inches wide through which men can crawl for example one of the entrances to the tunnel system is behind the glass in all just up to a three by three foot great and you find yourself going down into an infant's and the step tunnel ways leading in several directions if you go south towards Elm Street then you will find yourself in one of the sewers which is a long side of Elm Street the sewers that go along side of Elm main and commerce look to the person riding in a car this there is a about six inch high slits into which the drainage goes but actually inside these are like concrete pillboxes they're possibly five and a half feet deep and a man standing inside can easily see into the back of a convertible we had one of our investigators get in inside in Dallas one morning we hadn't get in before dark because we were afraid that if you know if the wrong people Sloan get in he might be seen at it in there and we never seen so I just heard recently just after week we really found the the application and the likelihood that the sewer system was used give an example of what appeared in you that the that Dallas is planning to dig up this entire area in Dealey Plaza the entire sewer system and create a great underground parking garage and the name of it is supposed to be the John F Kennedy parking garage well if I had not if I had not had a single thought about the possibility of a sewer system having you been used before this would have

[00:20:01 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1201s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1201s)

you been used before this would have aroused my ansible because this is just about the last bit of physical evidence that remains in the scene there's been a pattern of destroying and removing and shifting everything and I wouldn't be surprised but what this was related to it on the other hand it might be entirely coincidence anyway the sewer system the closeness of these sewers to a man riding a convertible down Elm Street becomes very significant when you consider that there was a bullet found on the south side of Elm Street in the neutral ground it landed on its base among pieces of the president's head we have photographs of the bullet and in the photograph you see deputy sheriff buddy Walters of Dallas smoking cigarette looking down the bullet and you see a Dallas policeman firmly standing on top of a manhole cover which leads down into the sewer system I don't know why he's standing there at this time it would be kind of hard to get in there if he was standing there and the clock over their shoulder shows that it is 12:40 this picture was taken ten minutes after John Kennedy was shot and his heart was still beating when the Birdman in the picture who appears to be a federal agent although we are unable to identify him because there's no way to get any kind of cooperation from the federal government is picking up the 45 caliber bullet the size of the bullet has been identified by comparison with real bullets and there's no question about the fact this is the 45 caliber bullet which landed on its base among pieces of the President's head now this was never admitted into evidence in the Warren Commission nor was it ever mentioned in the warrant

[00:22:01 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1321s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1321s)

mentioned in the warrant in any way in fact they pretended that there was a great mystery no bullets were ever found except number 399 which was found at the hospital both to which they can sign the seven different wounds now the 45 caliber although it was in the picture and is being picked up as being looked at by sheriff buddy Walker's is now ceased to exist officially because it creates a problem for the federal government it's not possible to see the 45 caliber bullet from the 6.5 manlichen 5 panel the official fairy tale says that I was the lone assassin therefore it is necessary for this boat to become an honorable and already sheriff buddy office has applied when we made the photograph available that he doesn't think he found the bullet and it's kind of hard to remember it's a lot of things happening that day and you can't remember whether you found a 45 bullet sitting there or not he doesn't think he's on the pole well today we released and I hope it makes a new services out here we release a copy of a correspondence between two members of the Warren Commission two attorneys and one of them is referring to the fact that sheriff buddy Wallace originally had said that he found the bullet but now had backed off from asking into question about Fred so this is one situation in which finally the federal government has been called they have told so many lies one lie after the other new lies to keep the old Lives the old lines of a lie this is one time when we have finally caught them it's one thing to know that they've lied and anyone who the Warren Report or my clean work or

[00:24:02 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1442s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1442s)

the Warren Report or my clean work or Harold Whitesburg looked into it passed another his government this line to another systematically at least in this area and if in this area God knows how many other areas but here we finally have them caught the bullet is so clear we knew they would say that bullet is not a bullet so we held off with the letter describing the deputy Sherriff statement and now we have the Warren Commission record and a photograph to show that the federal government did find and concealed a 45 caliber caliber bullet that was certainly involved in the assassination of President this is very significant because it means in terms of overwhelming probability that not just the command of the FBI but Lyndon Johnson himself had to know before the sunset that evening that among the bullets was killed John Kennedy there was a 45 caliber bullet it means that Lyndon Johnson had to know when Oswald was arrested among other things for being the assassin the president that he could not have fired a 45 caliber bullet and it means that Lyndon Johnson had to know that when Oswald was executed by Jack Ruby that they the assassins were simply getting rid of a patsy a man who might tell about what really happened but I haven't heard a word yet from Lyndon Johnson about the 45 caliber bullet which is employee found at 12:40 it means furthermore that even before the Warren Commission was appointed the command of the FBI and the President of the United States had to know there were

[00:26:01 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1561s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1561s)

States had to know there were of people shooting a John Kennedy and that the Dallas police scenario was completely false and in the final analysis it means that every one of these honorable men without any exception prostituted himself let his country down let you down by participating in an absolute fraud knowing that it was a complete lie yes what is your opinion of two articles in starting line are you referring to the recent to Thompson Josiah Thompson article in post all right let me answer that question first the professor Thompson's article I think is a very scholarly presentation of what the major critics Maggie field that last sentence listen and Mark Lane and her wife's Berg have contended for some years I think it was a very effective presentation and I think that the major points are without any question true I think possibly you could argue about details like his conclusion about both 399 but I think it is a serious contribution particularly because of the careful way that he assumed many alternatives remain but to assume that there were at least three shooting positions now with regard to Life magazine of which articles are you

[00:28:01 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1681s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1681s)

Life magazine of which articles are you talking about the articles that say untied in with a mafia or listen I stopped reading life about that time I haven't I think so last magazine rendered a serious service to this

country year ago in its anniversary issue when it had an article entitled matter of reasonable doubt and it helped lead the way in reexamining the assassination of John Kennedy oh I don't want to it wisely criticized life because God knows what ten oppressors are coming from the White House now to the management of Life magazine I'm sure it's nothing less than that I think in the long run that the images of life are concerned about the truth like the attitudes of other magazines but the only thing I can say about the last article which is really nothing but a plan presentation of pictures is that right now for reasons which I don't understand life is not in the battle but I hope that we see them there again because God knows mr. Nathan any other questions are you saying how do I conclude that I will did not shoot the president that all right well first of all there is no

00:30:03 (<https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1803s>)

all right well first of all there is no evidence that he did not normally when you are going to charge someone with a crime you are required to present evidence that he did do it and the defense did not have to present evidence that he did not nevertheless our last axis as his defense counsel and give you a few examples of evidence indicating he did not the examination of the rifle for fingerprints did not produce fingerprints of Lee Harvey Oswald the indications that fingerprints of özil were obtained and announced by some individuals in Dallas right after the assassination were untrue the Federal Bureau of Investigation which is the only sound cent fingerprint what which is a sound this rather laboratory in the country found no fingerprints of Lee Oswald if identifying a gun on the rifle secondly Oswald was given the nitrate test which is a very effective test if you fire a rifle it leaves traces of nitrate on your cheek if you fire whether on your right side your right cheek will have traces of nitrate you see fires in your left side your left side web pages of nitrate Oswald was exonerated by the nitrate test which indicated that he did not fire a runnable I might say that the evidence exonerating ours will is so complete that had he lived they could not have had a trial it would not have dared to come to he had to be executed and then you had a fraudulent Commission like the odd the Warren Commission to make it appear that

00:32:00 (<https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=1920s>)

Warren Commission to make it appear that he he did these things when he wasn't even they've seen a third the rifle mannlicher-carcano was not even tested to see if it had been fired that day with very good reason since it apparently had not been fired that day for Mazal was not a very good shot and there is no acceptable evidence that he had ever shot a rifle since he left the Marines the last time he said in the Marines he just barely qualified as marksman and there's no indication the shot since fifth the telescopic sight on his mannlicher-carcano and never been in his the services had never been adjusted since the shipment and before they test fired it they bore sighted it in the linemen because you could not fire it the the site was out of line with the tube of the gun furthermore it was a physical impossibility for Oswald to get downstairs and that's all the time especially if he had to wipe off the fingerprints and hide the gun under the boxes go from the sixth set fit to the fourth fourth the third third second in the same time that Roy truly and Marian Baker went from the first and second furthermore during the time that he is supposed to come down and if he had been able to do that he would have been the decathlon champion of all time if he had been able to do that but he he couldn't possibly but incidentally one missing thing is in conducting their test to see if he could do this is typical of the of the type of tactics we federal confusing they found in Marion Baker's testimony it they also saw on second-floor drinking a coke they found that if the man ran fast enough I think they got somebody from some track star from

00:34:00 (<https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=2040s>)

somebody from some track star from recent track events and had him running down the steps they found that they could get him down there maximum speed to reach the Coke machine but could not get the coke out of the Coke machine honest this is true so what they did was they brought back Marion Baker and had him reexamine his written statement and now if you look at it in the exhibits in the Warren Commission you will see where he is scratched out and was drinking a coke that scratched out that's what is known as

rewriting history to make it confirm to the official fairy tale to get to another part of the forest Tippett was shot well I might add one more thing as a matter of fact of time the shooting you'll see this in the November 22nd issue of the Dallas Times Herald one of the men who ran the Book Depository went inside immediately after the assassination and happened to see Lee Oswald on the first floor this is before he went up to get a coke so I'm on the first floor well this isn't too useful to the little assassin theory so this was never mentioned again in other words he was never hired in the second and was apparently on the first floor at the time of the assassination physical impossibility for many points of view tempered shooting furthermore the the witness the only witness they were able to find in the hundreds of people there mr. Brennan who was finally willing to say that he saw Oz with one so initially insisted it was not awesome but he finally agreed it was and they had their witness but that's all they could get out of hundreds of people on the other hand more than one person saw several individuals up there in the sixth floor and so it any any serious examination that the Dealey Plaza

[00:36:01 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=2161s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=2161s)

examination that the Dealey Plaza picture eliminates high as well as a possibility of any kind the same is true with regard to also tip also Tippett was killed by two men who were lighted from a car when they left one my left in the car and the other left running both over the black-headed neither one with the slightest bit likely ozma as a matter of fact they found the mixture of cells on the ground afterwards one was a an automatic shell and several shells and revolvers this was suggested to the average reasonable man that there were two men and as long as was supposed to have an automatic in one hand and a revolver in the other furthermore also could not possibly have made it timewise if you use the time standard by the Maine State witness furthermore the the test of the 38 for fingerprints indicated that there were no fingerprints on it at all now that was excluded from the Warren Commission because of the scandalous implications of that we obtained that from the Texas investigation you got a copy the Texas investigation found in it at this 38 Smith & Wesson which I was well disposed to have used to kill typical and then running down the street pulling the cells out putting in new cells then later at the Texas theater he's wrestling with the officers and he tries to kill one and it doesn't go off and they're pulling him and they get the gun it doesn't have one fingerprint on it isn't it unbelievable even the Warren Commission didn't have the stomach to introduce that so anyway we could go on and on the path considering to begin with the prosecution has the burden of proof I submit as a defense counsel in this instance that it's apparent in

[00:38:00 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=2280s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=2280s)

this instance that it's apparent in terms of probability that ISIL was not involved in the shooting at all little boy right there what helpless take questions if I understand one how many bullets were shot at President Kennedy or how many is he hit with secondly how many persons do I think shot at him in third were any bullets of the 6.5 caliber found in the president's body it's a little hard to say anything about the autopsy because commander Humes will perform the autopsy burned his autopsy notes and was subsequently promoted that's true I know a deputy sheriff in Dallas on the other hand they told the truth and stuck to it is not a deputy sheriff anymore but commander Humes burned his autopsy notes and he's been promoted and as a result there's no way to know well just where the president was hit or what his autopsy notes really had in him if we were able to look at the photographs the autopsy photographs we would know how many times he was hit and where that's a very good question and was the first question before the Warren Commission and yet they did not have the stomach to look at the autopsy because they knew what they would see so we don't know either because Lyndon Johnson administration is still keeping it secret now as to how many are involved both of the operating group of the scene I don't

[00:40:01 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=2401s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=2401s)

the operating group of the scene I don't have to speculate and I don't like to speculate there we have names of some individuals who have participated I think largely as a result of luck but we have the names of some of them most of them did not pass through our jurisdiction and we don't quite know what to do with the

names right now imagine if we turn it over the federal government I get a promotion a one-man that we've identified as being involved in assassination works at a military base a number of witnesses in the New Orleans area that have wide consistent men which used to tell the truth the government is obtained tain jobs for them at Chrysler or Boeing it'd be amazed how many people that work for the right exalted company that now work for Chrysler Boeing that suddenly develops an interest in the defense effort but there's no way to estimate how many are involved except to say a hell of a lot because they obviously were using transistor radios for communication they had at least one man transmitting as to the point where the presidential route was they had used at least four possibly five routes five points of shooting and they obviously had to use Scouts and individuals to stand to the side and keep an eye open so I say at least 10 or 15 I'll tell you what may give you a rough guide if I were to ask you all tonight if anybody had been arrested at Dealey Plaza for the assassination of John Kennedy you'd probably say certainly not but the fact is that they arrested 10 men 10 try and get their names you can't

[00:42:04 \(https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=2524s\)](https://www.youtube.com/watch?v=P5zeuEm4Yzg&t=2524s)

men 10 try and get their names you can't get their names because obviously a few things went wrong and the police stumble across some of the men who were involved sometimes some days things just don't go right this was the probable reason for the shooting of officer Tippit because if you study the radio logs you see a continual reference to individuals running back in the railroad yards and other individuals being seen by cop Stadium with a rifle other individuals getting out of cars with rifles and so forth citizens are pointing these things out suddenly officer Tippit is killed immediately there's no more interest in Dealey Plaza all attention turns to Oak Cliff when these men will turn loose nobody asks the question or thought about it for several years we're trying to get the names of some of them we've located photographs of some of them and we've made some identification but I can assure you there's no help from the from the Dallas Police Department and even less from the federal government

END
